ROOM 17

This term, Room 17 has been learning about structures. We have found out about famous buildings around the world and even tried making our own. We've made structures out of Lego, blocks, building straws, paper, cardboard boxes and even marshmallows and toothpicks!

Metropolis, Auckland, New Zealand by Alex

Metropolis is the biggest apartment building in New Zealand. It was built in 1999. It has 39 floors. It has over 52 windows. It is 155 metres tall. It looks like stairs.

The Eiffel Tower by Wade

The Eiffel Tower is located in Paris, France. It was built in 1889. It is 320 metres tall – wow! It is made of iron. It sways a few centimetres in the wind – that is short. It has to be painted every 7 years. It was the tallest structure in the world for 41 years, until the Empire State building got built. The Eiffel Tower has a lot of holes in it.

The Vero Centre by Alice

The Vero Centre looks like a toilet seat up on the top. It has 38 floors and it was built in 2000. It is 172 metres tall and is the tallest office building in New Zealand.

Sky Tower by Stirling

The Sky Tower is in Auckland. It was built in 1997. It is made of concrete, aluminium and glass.

The Leaning Tower of Pisa by Edward

The Leaning Tower of Pisa is in Pisa, Italy. The Leaning Tower of Pisa was built in 1372. Did you know that the Leaning Tower of Pisa is over 700 years old?!

FOTS Update

One more sleep until Trivia night and kids lunchtime disco.

Trivia night - doors open at 6:30pm and trivia starts at 7pm. Not too late to buy your tickets, no door sales.

Kids lunchtime disco - don't forget your gold coin

We will be selling Trivia Night Raffle Tickets today and tomorrow after school - \$2 or 3 for \$5. A great opportunity for those who won't be attending Trivia Night to support this fundraising event. Don't forget to tell family and friends about the Pre-Sale Package donated by Regan Golding of Ray White - details and bidding available at the office.
